"I started repairing my car myself when it became quite clear that I should let you guys handle it."

Problem Checked

An auto mechanic received a repair order that read: "Check for clunking sound when going around corners."

Taking the car out for a test drive, he made a right turn, and a moment later he heard a 'clunk'.

He then made a left turn and again heard a 'clunk'.

Back at the shop he opened the car's trunk, and soon discovered the problem.

Promptly he returned the repair order to the service manager with the notation, "Removed bowling ball from trunk".

Customer Loved

ELIZABETH F.

So happy to have been referred to this business by a friend! I have been trusting my car to them for approximately three years now, and am never disappointed. I have received detailed explanations as well as pictures for various repairs they recommend, and there is no pressure. They absolutely go above and beyond their customer service so that I not only understand warranties, services, etc. but I also receive my car when promised. Just simply the best!

ANDREW D.

Friendly staff and quality work for a very fair price.

Nissan, Infiniti recalls 1.2M vehicles

"Nissan North America, Inc. is issuing a massive recall on pretty much every 2018-2019 model due to a faulty image on the back-up camera.

Specifically, the recall involves certain 2018-2019 Nissan Altima, Armada, Frontier, Kicks, Leaf, Maxima, Murano, NV, NV200, Pathfinder, Rogue, Rogue Sport, Sentra, Titan, Titan Diesel, Versa Note and Versa Sedan vehicles, as well as Infiniti Q50, Q60, QX30 and QX80 vehicles. Additionally included are 2019 Nissan GT-R, Taxi and Infiniti QX50, QX60, Q70, Q70L vehicles.

The back-up camera and display settings can be adjusted such that the rear view image is no longer visible and the system will retain that setting the next time the vehicle is placed in reverse. As such, these vehicles fail to comply with the requirements of Federal Motor Vehicle Safety Standard (FMVSS) number 111, "Rear Visibility."

The lack of an image in the back-up camera display increases the risk of a crash.

RunningPaws.com: "If a dog does not get adequate exercise (more than you might believe), this instinctive energy will build up and demand an outlet. So if your dog is chewing the couch, indulging in excessive barking, or other obnoxious behaviors it may very well be that it is under exercised and bored."
